Minimally Invasive Gynecologic Surgery Course and Cadaver Lab

JANUARY 16-17, 2016 | TAMPA, FLORIDA

CAMLS (Center for Advanced Medical Learning and Simulation)

Provided by:

www.gynlap.com
www.camls-us.org
Course Description:
The Minimally Invasive Surgery Course is a cadaver based, hands-on educational program designed to provide an in-depth experience in Gynecologic Minimally Invasive Surgical techniques. It is designed for gynecologic surgeons who desire to advance their laparoscopic skillset and knowledge base, and apply these skills to perform more advanced Minimally Invasive Surgeries in their practices. It will include training in laparoscopic suturing techniques, laparoscopic surgical dissection and effective use of laparoscopic instrumentation. Surgical techniques to prevent and repair bladder and bowel injuries will be taught and performed. Inanimate laparoscopic trainers are available throughout the entire course so that participants can master the skills of laparoscopic suturing and knot tying.

Target Audience:
This course was specifically designed for obstetricians and gynecologists, gynecologic surgeons, OB-GYN residents and fellows.

Learning Objectives:
Upon completion of this seminar, the participants should be able to:

**Describe** pelvic anatomy as it relates to Gynecologic Minimally Invasive Surgery.

**Select** appropriate surgical techniques and instrumentation for use in Gynecologic Minimally Invasive Surgery.

**Develop** the skillset needed to efficiently perform laparoscopic suturing and knot tying.

**Acquire** the skills and techniques necessary to perform advanced laparoscopic Gynecologic Minimally Invasive Surgical procedures including the basic steps of laparoscopic bladder and bowel injury repair.

Gap Analysis:
The advantages of minimally invasive surgery over conventional laparotomy are unquestioned. However, major gynecologic procedures are oftentimes performed through open laparotomy incisions instead of being performed in a minimally invasive manner due to the fact that these surgical procedures are difficult for most gynecologic surgeons to master. There is a need for gynecologists to be well versed in the myriad of conservative and surgical treatment options, including laparoscopic surgical techniques.

### Breakout Lab Sessions During Cadaver Lab

**Laparoscopic Suturing Lab:** Inanimate laparoscopic suturing trainers will be available for participants throughout the entire two-day course. Participants have the opportunity to master the skill of laparoscopic suturing and knot tying through practice and the use of video tutorials.

**Bladder and Ureteral Injury Lab:** Open and laparoscopic surgical techniques will be taught to repair bladder and ureteral injuries using tissue.

Program #: CH20162281120
COURSE DIRECTORS:

Stuart R. Hart, MD, MBA, MS, FACOG, FACS
Associate Professor
Division of Female Pelvic Medicine and Reconstructive Surgery
Department of Obstetrics and Gynecology
Chief Medical Officer of Innovation
USF Health Center for Advanced Medical Learning and Simulation (CAMLs)
University of South Florida Morsani College of Medicine
Tampa, Florida

M. Jonathon Solnik, MD, FACOG, FACS
Associate Professor
Head of Gynaecology and MIS
Department of Obstetrics and Gynaecology
Faculty of Medicine – University of Toronto
Mt. Sinai Hospital
Toronto, Ontario, CANADA

FACULTY:

Renee Bassaly, DO, FACOG
Assistant Professor
Department of Obstetrics and Gynecology
University of South Florida Morsani College of Medicine
Tampa, Florida

Jon Ivar Einarsson, MD, PhD, MPH
Associate Professor of Obstetrics and Gynecology
Harvard Medical School
Director, Division of Minimally Invasive Gynecologic Surgery
Brigham and Women’s Hospital
Boston, Massachusetts

Mitchel S. Hoffman, MD
Professor
Department of Obstetrics and Gynecology
University of Central Florida
College of Medicine
Gynecologic Oncology
Orlando Health First Medical Group
Orlando, Florida

Anthony N. Imudia, MD
Assistant Professor
Director, USF Center for Fibroid and Endometrosis
Research and Treatment
Division of Reproductive Endocrinology and Infertility
Department of Obstetrics and Gynecology
University of South Florida Morsani College of Medicine
Tampa, Florida

Emad Mikhail, MD
Fellow, Minimally Invasive Gynecologic Surgery (FMIGS)
Department of Obstetrics and Gynecology
University of South Florida Morsani College of Medicine
Tampa, Florida

Vadim Morozov, MD, FACOG, FACS
Assistant Professor
Department of Obstetrics, Gynecology and Reproductive Sciences
University of Maryland School of Medicine
Medical Director
Paca-Redwood OB/Gyn Faculty Physicians, Inc.
Program Director
Center of Excellence in Minimally Invasive Gynecology (COEMIG) at UMMC
Baltimore, Maryland

Resad Paya Pasic, MD, PhD
Professor of Obstetrics and Gynecology
Director of the Center of Minimally Invasive Surgery
Co-Director of the Fellowship in Advanced Gynecologic Laparoscopy
Department of Obstetrics and Gynecology
University of Louisville
Louisville, Kentucky

Craig J. Sobolewski, MD
Assistant Professor, Department of Obstetrics and Gynecology
Division Chief, Minimally Invasive Gynecologic Surgery
Duke University School of Medicine
Durham, North Carolina

Robert K. Zurawin, MD
Associate Professor
Chief, Minimally Invasive Gynecologic Surgery Section
Director, Fellowship for Minimally Invasive Gynecology Surgery
Department of Obstetrics and Gynecology
Baylor College of Medicine
Houston, Texas
Faculty Disclosure:
USF Health adheres to the ACCME Standards regarding commercial support of continuing medical education. It is the policy of USF Health that the faculty and planning committee disclose real or apparent conflicts of interest relating to the topics of this educational activity, that relevant conflict(s) of interest are resolved, and also that speakers will disclose any unlabeled/unapproved use of drugs or device(s) during their presentation. Detailed disclosure will be made at the conference and in the conference materials.

Equal Opportunity and ADA Statement:
USF is an Equal Opportunity / Affirmative Action / Equal Access Institution. For disability accommodations contact Cindi Hughlett, (813) 224-7856 within five days of the event.

Cancellation:
The Office of Continuing Professional Development (CPD) at the University of South Florida reserves the right to cancel this activity due to unforeseen circumstances in which the full registration fee will be refunded. USF Health is not responsible for travel expenses incurred by the participants if the course is cancelled.

Disclaimer:
This information provided at this CME/CE activity is for continuing education purposes only and not meant to substitute for the independent medical/clinical judgment of a healthcare provider relative to diagnostic and treatment options of a specific patient’s medical condition.
