Hot Topics in Gastroenterology 2017: Updates for the Practicing Gastroenterologist

February 11, 2017
USF Health CAMLS
124 S. Franklin St. Tampa, FL. 33602

The Purpose
Keeping with the long tradition of teaching excellence at the Division of Digestive Diseases and Nutrition, this course has been developed with special focus to the educational needs of health care professionals associated with the rapidly evolving specialty of gastroenterology. This one day course addresses today’s burning topics in a lecture and discussion format. A distinguished faculty comprised of USF gastroenterologist affiliated with the Division of Digestive Diseases and Nutrition and an invited lecturer will present key topics highlighting their current state of practice while providing projection for the future. In addition we will introduce new faculty members, and highlight current research at the USF Division of Digestive Disorders.

Learning Objectives
After attending to this activity, the participant will demonstrate the ability to:

- Recognize and manage complex esophageal disorders including eosinophilic esophagitis, reflux esophagitis, and Barrett’s disease.
- Apply best management strategies for treatment of pancreatic fluid collections, and diagnostic tools in biliary strictures.
- Describe the strategies for cancer surveillance on inflammatory bowel disease.
- Provide adequate treatment for Hepatitis C, non-viral hepatitis, and cirrhosis.
- Describe the evaluation, and management of obscure gastrointestinal bleeding.

These learning objectives apply to all members of the target audience.

Target Audience
This course is specifically designed to meet the educational needs of gastroenterologists, surgeons, internal medicine physicians, family medicine physicians, physician assistants, nurses, as well as internal medicine residents and fellows.
