

HSC_3240

Trends & Theoretical Foundations in Healthcare Simulation

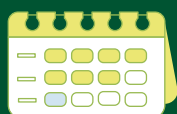

Take your first step into the future of healthcare simulation by enrolling in HSC3240. Gain the skills and insights to become a leader in this innovative and rapidly growing field. Sign up today and shape the future of healthcare!

CLASS MEETS

FA25

MONDAYS 11:00 AM -
WEDNESDAYS 12:15 PM

This course explores the essential trends and theoretical foundations in healthcare simulation, providing students with a comprehensive understanding of trauma and medical conditions, human body systems, healthcare terminology, common healthcare procedures, and simulation history.

USFHealth

CAMLS
Center for Advanced Medical Learning and Simulation

Course Faculty:

Tiffany Moretta, MS, Simulation Educator
USF Health, MCOM Department of Medical Education

Classroom:
CPH 1023C
